

# PARAGON ELECTRIC KILNS

Dragon

Although this catalog features only the most popular, electronically controlled, Paragon kilns, **all of Paragon's more than 50 models are available from Laguna.** Kilns not shown include the S-Series (manually-fired kilns with infinite control switches) and SnF-Series (semi-automatic kilns with multiple switch-timers, Dawson Kiln Sitters and limit timers). **For complete descriptions of the entire Paragon line, contact a Laguna kiln specialist at 1-800-4-LAGUNA.**

### 3 Steps to selecting Paragon's Electronically Controlled Kilns:

- Select the size, shape and cone rating of the kiln most suitable to your firing requirements. The Viking and TnF models listed below are 10 or 12 sided while the Dragon is a square, front-loading design.
- Identify the items from the Features & Options column that are important to you.
- Contact a Laguna kiln specialist with any technical or kiln questions, or contact the Laguna Order Department for our best current pricing.

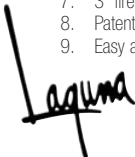

TnF-28-3

Paragon Electronic Kilns								
Model	Cone Rating	Interior Dimensions		Cubic Feet	Popular Features & Options	Kiln Prices <sup>1</sup>	Furniture Kits	
		Diameter (inches)	Height (inches)				Low Fire # Price	High Fire # Price

<sup>1</sup>Prices are MSRP and F.O.B. Texas. Call for current discounts and specials.

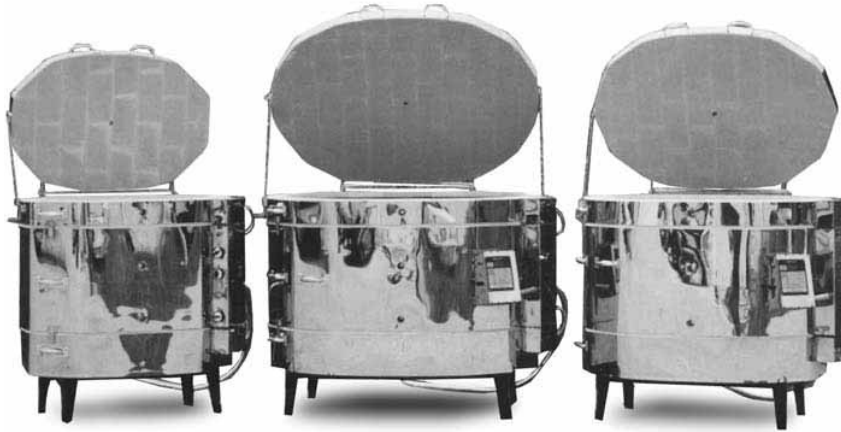

Key Features & Options are standard unless price is indicated.

1. Front loading
2. 16,500 watts
3. 14,400 watts (33% more than comparable top-loading models)
4. Sentry 2.0 microprocessor developed by Orton and Paragon. Operates in either cone fire or ramp-hold modes. Easy to read 14 segment display. High resistance to RF radiation. Temperature stability. Cool-down segment. Storage for one 20-segment and three 10-segment ramp-hold programs. Select between K, S and R thermocouples with simple keystrokes. Program safety lock.
5. Industrial gauge elements
6. 4" walls, top and door; 4-5" floor (saves energy; cools slowly)
7. 3" firebrick walls, lid and bottom
8. Patented spring-balance LiteLid for remarkably easy lifting
9. Easy access control box for convenient maintenance
10. Proportional power elements for even heating
11. Operating instructions conveniently provided on control box
12. UL and Canadian UL listed
13. Fall-away Prop-R-Vent with two settings
14. Long-life electrical systems include (1) nickel-plated copper wire covered with high-temperature, glass-braided insulation; (2) heat-dissipating connections, and (3) stainless steel heat shield
15. Optional Orton kiln vent Call for Price
16. Optional roof-mounted greenware drying rack Call for Price
17. Optional 3-zone control, K or S type thermocouple Call for Price
18. Optimal ITC brick wall coating Call for Price
19. Optional door elements Call for Price
20. Optional stainless steel finish Call for Price
21. Optional 18" stand with casters or 24" stand without casters Call for Price
22. Optional APM long-lasting elements Call for Price

# OLYMPIC

Featured below are several of Olympic's most popular electric kilns - the Ovals ranging in size from 5.25 to 22 cubic feet, and the mini-sized, .3 cubic foot, 120 volt, "Doll" or test kiln. For information and pricing on these and all other Olympic kilns, contact a Laguna kiln specialist at 800-4-LAGUNA or [info@lagunaclay.com](mailto:info@lagunaclay.com).

Olympic Oval Electric Kilns

## Ovals

- Great for large pieces and large loads
- Sizes up to 22 cubic feet
- Cone 8 rated (most models)
- Heavy-duty construction
- Floor built into the bottom ring
- 3" brick
- Balanced heating elements for even heat top to bottom
- Hole in lid for venting
- Rings easily added or removed for "custom sizing"
- "Ring locks" prevent shifting
- Electronic Controller optional

120v Doll or Test Kiln

## Doll or Test Kiln

- Ideal for firing jewelry, enamel, dolls and small ceramic specialty items
- Compact design requires minimal space
- A great test or laboratory kiln
- Runs on 120 voltage
- Cone 10 rated
- Available with kiln sitter & timer or electronic controls

# HORMACA - CONE 10, DOWNDRAFT GAS KILNS

Laguna offers this amazing, 18 cubic feet, Cone 10 gas kiln because there is nothing else like it on the market, and the value is excellent. Hormaca's G52 is a 12-sided oval kiln that features an exclusive heat-diffusion system that divides the inside of the kiln into 3 chambers - a baffled, combustion chamber at each end and a large, central firing chamber.

## Features Include:

- Downdraft design, heat-deflecting baffles and chimney design guarantee proper heat diffusion and distribution (chimney not shown)
- Cone 10 rating
- Four, high-efficiency, 75,000 BTU venturi burners
- Electronic starter
- Analog pyrometer
- Dawson Kiln Sitter and limit timer
- 100% safety shut-off valve
- Stainless steel jacket
- 3" K-23 firebrick wall
- Double gas security system
- Damper easily adjusted
- Easy installation and portability (unlike most gas kilns)
